Adding Videos to the Course Media Gallery

When you perform a course copy into a new course site, only videos previously embedded into content areas (using the Kaltura mashup feature) will transfer over. To add them into the Media Gallery of your new course, you must select them from your private media page using the following steps:

1. Navigate into your course site
2. Select Media Gallery found under Course Tools (near the bottom left-side of your course site),
3. Click Add Media on the Media Gallery page and select the videos you would like to publish into the Media Gallery using the check-boxes (near the left-side of the page)
4. After choosing the videos, select Publish (near the right-side of the page)
